HELENA INDEPENDENT RECORD

MAY. 1966

April Job Upswing Adds 6,800 to Industry Payrolls

Job Upswing Sets Record—Seasonal employment expansion in Montana was in full motion during April, Job expansion occurred on a variety of industry fronts despite some bad weather in a few areas during the month. Employment estimates compiled by the Commission in cooperation with the U.S. Bureau of Labor Statistics found 181,-200 non-farm wage earners on payrolls at mid-month. This is an unusually high figure for this time of the year and presages an employment peak in non-farm industries of 190,000 or more later this year. This April's non-farm employment total exceeded the same month last year by 7,000 workers, and represented an increase of 6,800 from March 1966. It was the highest April industrial employment total on record, and marked the fourth month this year of record setting employment.

Gains Show In Most Groups—All major industry groups but two exhibited employment gains over March totals. Construction payrolls rose to 12,200, after an increase of 3,600 workers from March, as work began in earnest on a wide variety of building and heavy construction. Employment in various government activities advanced by 1,300, with 900 more on state and local payrolls and another 400 at the federal level. The seasonal employment upswing was evident on main street with 1,100 more workers on April payrolls of trade firms. Retail trade added 900 workers while the gain in wholesale firms was 200. Increased payrolls at

hotels, motels, etc in preparation for a heavy tourist season accounted for most of the 400 employment advance in the service industry group. With the exception of lumbering, which dropped 100 from March, employment gains in other manufacturing marked up a total gain of 200 for the industry as a whole. Payrolls of the transportation, communications, and utilities groups was also up 200 from March. Employment in mining, at 7,500, and in finance, insurance, and real estate firms, at 7,000, remained unchanged from the March total.

Worker Shortages in both industry and agriculture will become more pronounced as the work season advances. Already the food industry is hard pressed to find enough experienced cooks and waitresses; sales clerks are in short supply in most major cities; miners, student miners, and journeymen craftsmen are needed for Butte's mining operations; the stepped up pace in building projects left a shortage of carpenand the demand for woods, mill workers, and heavy equipment opera-tors for the lumber industry exceeds the supply of available, experienced workers in these classifications. Continuing shortages of experienced farm and ranch hands persists in many areas. In-migration of transient farm labor does not match the past few years.

Big Schedule of Construction—Construction will be a potent force in the summer labor market picture. Major projects on the agenda include start of work on Libby Dam, a steam powered

electricity generating plant at Billings, renovation work at the Anaconda smelter, expansion of production facilities at the Columbia Falls aluminum plant, a \$4 million Billings oil refinery expansion, and new super markets, motels, educational buildings and highway projects throughout the state, among others. More than 800 are now employed at missile installations locations in north central Montana. Work on Yellowtail Dam is winding up with a work force of 325.

Jobseekers Down 14% From Year Ago—The number of workers registered for jobs at the 22 local offices of the Montana State Employment Service totaled 13,566 as April ended. This was 2,238 fewer than the same month a year ago. In the April count were more than 4,300 women. During the next two months thousands of high school and college students will temporarily swell the labor supply as they search for summer employment. Some will go into jobs in construction, trade, and service, and agriculture. Others may not be so fortunate for the number of applicants will exceed the summer job openings.

Job Placements Exceed Last Year—Workers placed on industrial jobs by local employment offices totaled 3,283 this April, against 2,878 a year ago, a 14% increase. Job orders listed by industry employers were up nearly 24% from last year for a total of 4,176. The 1,743 workers placed on farm and ranch jobs exceeded the April, 1965 total by 21%.

Along the Hiring Line— Field Summary for April

ANACONDA. Deer Lodge, Philipsburg—April hiring trends most active in construction and manufacturing. Work progressing on smelter renovation for increased zinc production. Work started on Job Corps gymnasium with 20 employed. Employment edging upward in trade, service and logging. Unemployment claims down 100 from last year.

BILLINGS, Columbus, Hardin, Laurel, Red Lodge, Roundup—Sharp upswing occurred in hiring by building and highway contractors as favorable weather held throughout most of month. City building permits totaled nearly \$3 4 million. Payrolls of highway contractors near 400 mark. Work on Yellowtail Dam still employs 325. Demand fast increasing for workers in food industries and auto service stations. Brisk farm labor demand found shortages of experienced hands.

BOZEMAN, Ennis, Three Forks, Trident—Non-farm job placements up 17 per cent from last year with trade industries accounting for most of the gain. Good demand evident for service station attendants. Logging making slow recovery from spring break-up period but most sawmills at good volume. Little employment change anticipated in cement, talc, and flour mills next 30 days. Farm hiring pace quickens with experienced worker shortages developing.

BUTTE, Virginia City, Whitehall—April labor market saw shortages of hard rock miners, student miners, and journeymen craftsmen for work in metal mining activities. Seasonal job upswing in building and road construction projects remained active. Work began on new supermarket, and plans underway for a 51 unit downtown motel. Farm labor demand picking up.

CUT BANK—Seasonal job uptrends most evident in construction and agricultural activities. Some workers leaving for jobs in Great Falls and Libby areas. Hiring for maintenance and repair work at Clacier Park to start soon. Farm labor demand increasing, exceeding supply of workers.

ing supply of workers.

DILLON—Cold weather had some effect on the farm front especially in calving activities. Lambing now in full swing. Construction work includes super-market, airport, summer resort, and highway projects. More activity noted in mall mining operations in

area. Nearly 100 placed on farm jobs during the month.

GLASGOW, Fort Peck, Malta, Opheim—New applications for work increased over last year due to students seeking part time work. Employment trends in most industry groups on the optimistic side. Heavy demand for farm workers with supply of transient labor below last year.

GLENDIVE, Circle, Wibaux—Mild weather allowed recall of more workers to outdoor jobs. Little new hiring in construction due to lack of new projects. Oil field operations on the slow side. Current building includes Jr. College, several service stations, and highway work. Several crews of sugar beet workers arrived from Texas for another season's work.

GREAT FALLS, Choteau, Fort Benton, Stanford—After slowdown in March, employment started to climb in April. Non-farm job placements exceeded the April 1965 total by 30 percent. Increased labor demands in construction and manufacturing paced the hiring trends. With the exception of farm implement and equipment dealers, most trade was still on the sluggish side. About 200 placed on a variety of farm jobs.

HAMILTON, Stevensville—Hiring trends above last year especially in logging, construction, and forest service activities as mild weather prevailed. Upturn also noted in trade, service, and government units. Local supply of farm labor is thin but arrival of transient sugar beet crews expected soon. Jobless pay claims down sharply from last year.

HAVRE, Chinook, Harlem—Good employment outlook in most industry groups with contract and road construction at the head of the list. Work started on \$300.000 motel. Work soon to begin on \$47,000 highway rest stop.

Seasonal increases in trade and service employment adds to economic picture. Farm job hiring this season will surpass last year.

HELENA, Boulder, Garrison, Townsend, White Sulphur Springs—Local economy exhibits good seasonal strength with increased hiring in all industry segments. Shortages of workers persists in stenographic, sales, cook, waitress and earpenter classifications. Work well underway on new \$1 million shopping center, new hospital, and Capitol renovation. Plans announced for senior citizens apartment complex. Constant shortages of farm labor as demand increased.

KALISPELL, Columbia Falls, Eureka, Libby, Whitefish—More workers went to jobs in lumber and plywood mills and trade and service firms as the tempo of seasonal activity picked up during April. Construction increasing with better weather and will see more expansion as season advances. New supermarket scheduled to open soon. Some logging operations still slowed by bad road conditions. Farm labor demand fairly active.

LEWISTOWN, Harlowton, Ryegate, Winnett—Industry job placements up 85 per cent from last month with construction accounting for most of the increase. Most other industry groups show seasonal employment gains. Farm labor demand rises sharply with worker shortages constant throughout the month.

LIVINGSTON, Big Timber—Good seasonal upturn evident in most industry groups with exception of logging still to recover from spring break-up period. Most mills continued to operate with reduced forces because of log shortages. Good hiring trends in trade and service firms. Hiring for Yellowstone Park active. Heavy farm labor demand with worker shortages.

Territoria de la compansión de la compan

Along the Hiring Line— Field Summary for April

MILES CITY, Baker, Ekalaka, Broadus, Jordan, Terry—Labor market activity showed little change from prior month. Cold weather and rain had some effect on outdoor work. Good agenda of highway work in area will be more active next month. Passive trends in trade and service firms. Farm labor demand exceeded supply of experienced workers

MISSOULA, Drummond, Arlee, Superior—Economic activity holding to good trends set earlier. Industry job placements 13% ahead of last year with most of the gain recorded in trade establishments. Logging making slow recovery but most mills at good capacity. Farm labor demand at good seasonal pace.

POLSON—Unemployment claims drop sharply as seasonal job upswing continues in most industries. Most lumber mills added more workers; logging hires starting to increase. Trade, service, and farm job openings up weekly.

SHELBY—Bad weather slowed some outdoor work during the month. Job placement activity starting to edge up slowly in construction, trade, and service firms. Shortage of farm hands and bad weather reduced farm job placement totals.

SIDNEY—A re a economy presents fairly optimistic outlook despite lack of major construction projects. No action yet on announced plans for construction of \$450,000 livestock sales yard. Construction workers taking farm jobs for present. High school students registering for farm work for summer season.

THOMPSON FALLS, Hot Springs—Good weather created more jobs for logging and sawmill workers. Hiring for forest service projects also up seasonally. Shortages of logging industry workers expected to develop later in season. Construction on slow side with no major projects in view.

WOLF POINT, Plentywood, Scobey—Construction in three county areas down from last year. Current work includes three highway projects, hospital addition, and street surfacing. Steady activity in oil fields with average of three rigs in operation but little new hiring. Good summer schedule of hiring main street trade and service firms. Good farm labor demand.

- (1) Estimates include all full and part-time wage and salary workers who worked or received pay during the pay period ending nearest the 15th of the month. Proprietors, firm members, personnel of the armed forces, domestic servants, and self-employed persons are excluded.
- (2) Preliminary estimates based on return from samples of 792 selected Montana establishments.
- (3) Figures previously released have been revised on return from 1.161 such establishments.
- (4) Includes fabricated metal products, machinery except electrical, furniture, stone and clay products.
- (5) Includes apparel, chemicals, and miscellaneous manufacturing products.
